## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10, 23, 24, 27, 28, 29, 36, 37-43 are, drawn to a resistor having a terminal with a concave groove. <sub>44 45 48</sub>

Group II, claim(s) 11-14 are, drawn to a resistor having a terminal with an L-shaped.

Group III, claim(s) 15-20 and 30 are, drawn to a resistor having four terminals (two on top and two on bottom). <sub>46, 49</sub>

Group IV, claim(s) 21-22, 31 and 35 are, drawn to a resistor having a terminal having a protrusion. <sub>47, 50</sub>

2. The inventions listed as Groups I, II, III and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The technical features of a concave groove, an L-shape, four terminals and protrusions are distinct so that the Groups are not linked.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Within Group I, there are: Species I a wire resistor and Species II a sheet/planar resistor.

Art Unit: 2832

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Within Group I: Species 1, claims 1-5 (and claim(s) depending thereto) and Species 2, claims 6-9 (and claim(s) depending thereto).

The following claim(s) are generic: None.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: In Group I, species 1 and Species 2 are linked only by the grooved terminals. However, this is not a special technical feature because it is known (as evidenced by Jaselii (4,588,976) and Sakai (4,509,034)) so by definition it cannot advance the art and be a special technical feature.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
